**Program Objectives**

UGA's NIH-funded Post-baccalaureate Research Education Program will provide intensive training to post-baccalaureate underrepresented minority and disabled students, promoting the skills required for admission to and success in top biomedical Ph.D. and M.D./Ph.D. programs.

UGA recognizes the lack of diversity in the field of biomedical research and is committed to helping the next generation of scientists reverse this trend.

**Application Requirements**

- Documented membership in a target group (racial/ethnic minority, persons with disabilities, disadvantaged background)
- U.S. citizen, national, or permanent resident
- ≤36 months past baccalaureate graduation
- Declared major or earned baccalaureate degree in a relevant life sciences discipline
- GRE score submitted to UGA (use code: **5813**)
- Application describing career goals, research interests and experiences, and motivations
- Official transcripts
- Three letters of reference

**Questions?**

UGA's Post-baccalaureate Training in Infectious Diseases Research is a new program. Our website is currently under development, so please check periodically for information about the program and the application process. We anticipate our first class will begin Summer 2014.
